Tuesday, May 9, 2017 – This webinar will be delivered in French.

Presentation 1: 12:00 to 13:00 EST

Titre: Entrustable Professional Activities (EPAs): The importance of observation and the art of feedback

Presenter: A radiation oncologist, Dr. Lambert is Associate Clinical Professor in the Department of Radiology, Radiation Oncology and Nuclear Medicine at the Université de Montréal. She completed a Master's in Medical Education in 2005, was residency program director in radiation oncology from 2004 to 2014, and became Assistant Dean, Postgraduate Medical Training, in 2011. She is in charge of providing pedagogical support to all residency program directors in addition to coordinating the implementation of Competency-Based Medical Education at the Faculty of Medicine.

Overview:

Brief introduction to the new concept of EPAs at the undergraduate level and in residency programs. Presentation of several basic concepts associated with direct observation and some tips for facilitating it. The essential keys for giving constructive feedback that will help the resident improve.

Learning Objectives:

1. Discuss the impact of implementing Competency-Based Medical Education in training programs

2. Prioritize the direct observation of learners in clinical settings

3. Give constructive feedback
